CYCLISTIC BIKE-SHARE

How Do Members and Casual Riders Use Cyclistic Differently?

Vansh Dhiman
Junior Data Analyst | March 2026

Today's Agenda

01 Business Task

What problem are we solving?

02 Data Overview

Where did the data come from?

03 Key Findings

What did the data reveal?

04 Recommendations

What should Cyclist do?

05 Next Steps

How do we move forward?

Business Task

"Analyze how annual members and casual riders use Cyclistic bikes differently to design a targeted marketing strategy that converts casual riders into annual members."

The Problem

Annual members are significantly more profitable than casual riders

The Opportunity

Casual riders already know and use Cyclistic — they just need to convert

The Goal

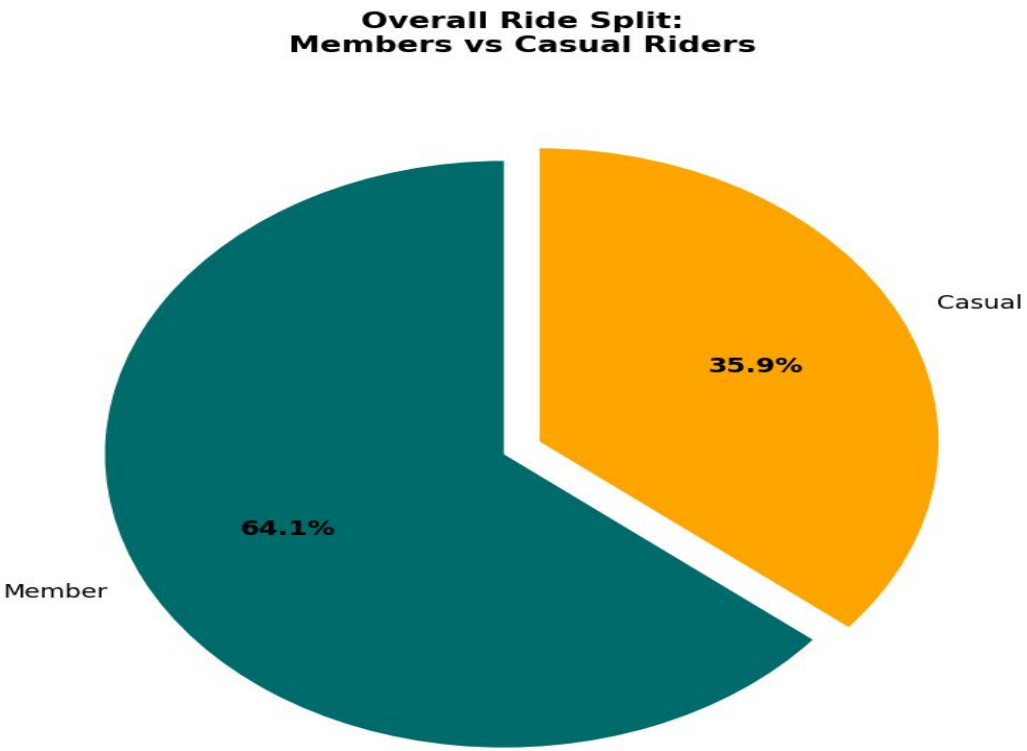
Design data-backed marketing to convert casual riders into members

Data Overview

~5.5M	12	13	12 mo
Total Ride Records	CSV Files Merged	Data Columns	Data Period

Source	Motivate International Inc. — public license
Period	March 2025 to February 2026
Tool	Python (Google Colab) — Pandas, Matplotlib, Seaborn
Key Columns	ride_id, started_at, ended_at, member_casual, station names
Privacy	No personally identifiable information — riders cannot be tracked
Cleaned	Removed negative ride lengths and rides over 24 hours

Finding 1 | Who Is Riding?



65.10%

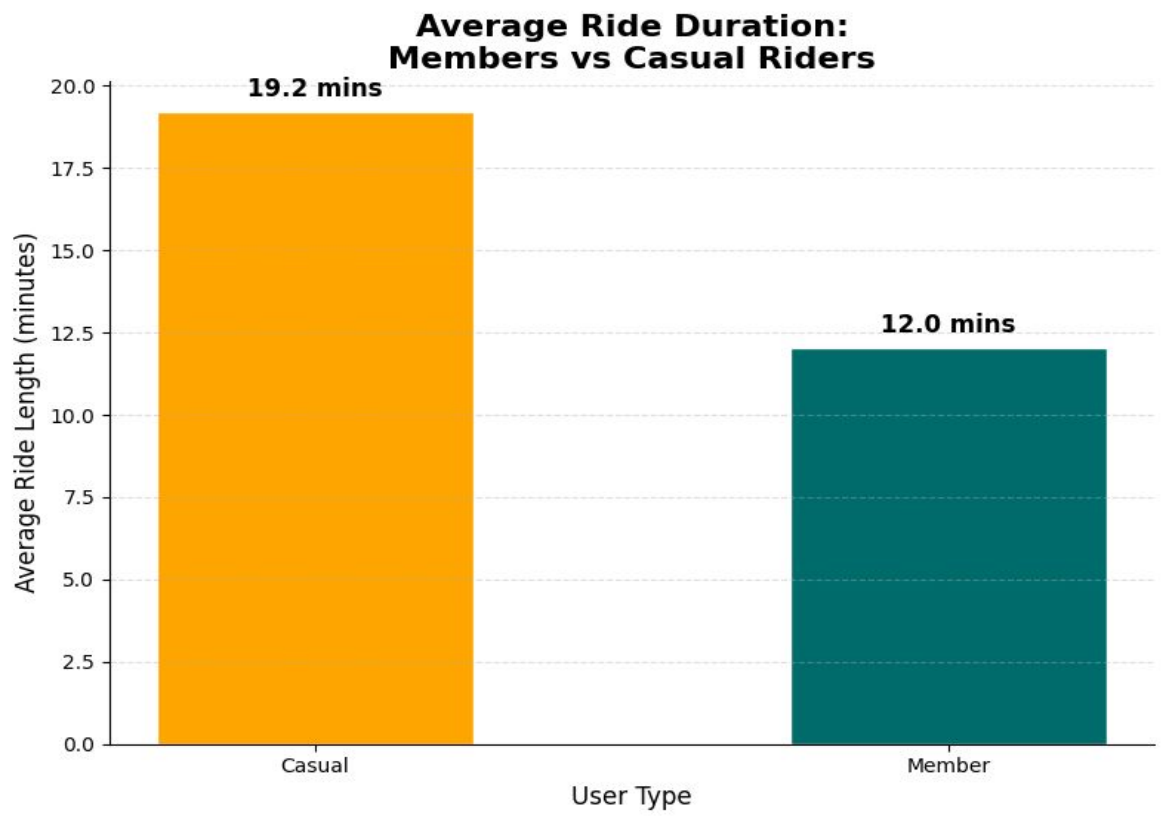
Annual Members

34.90%

Casual Riders

Casual riders represent a large and reachable conversion opportunity

Finding 2 | Casual Riders Take Longer Trips



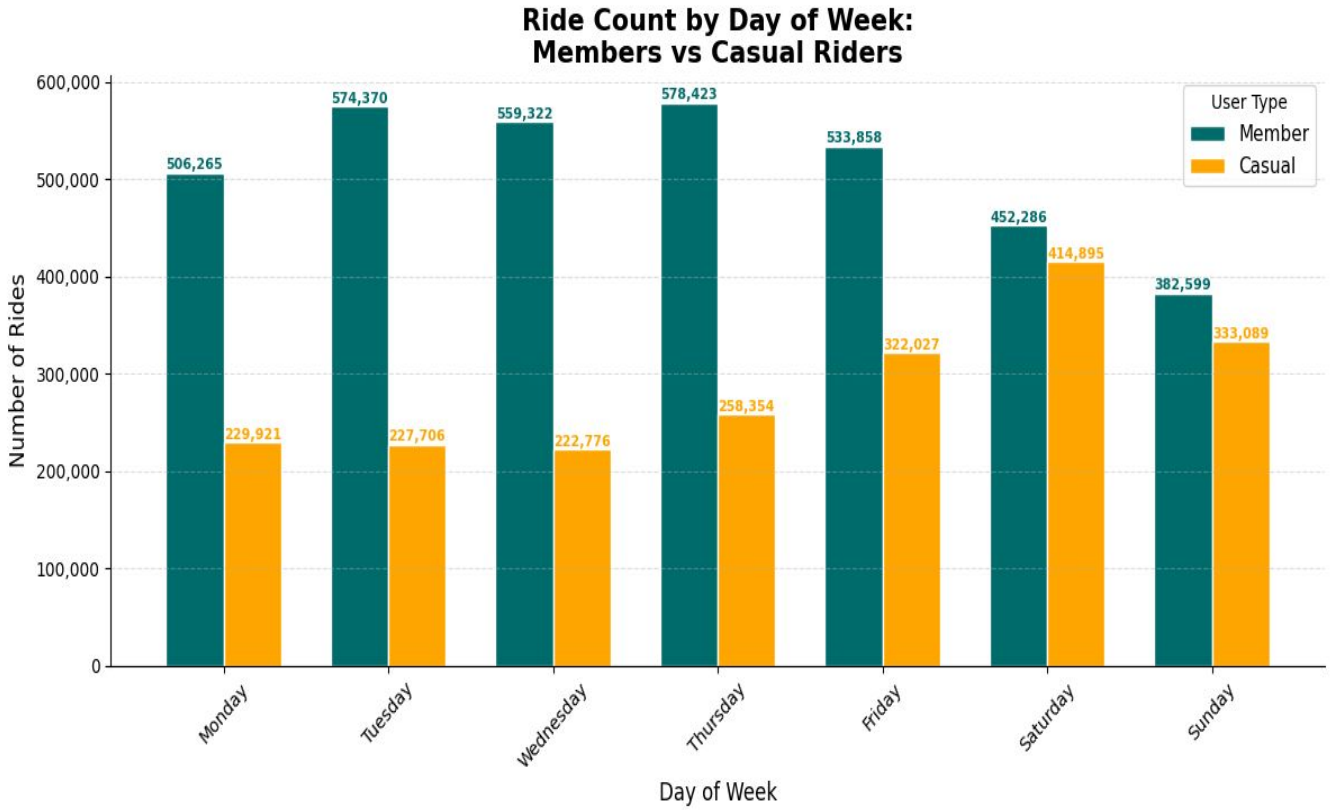
Key Insight

Casual riders ride nearly 2x longer on average than annual members

What It Means

Casual riders use bikes for leisure and exploration — not routine commuting

Finding 3 | Members Ride Weekdays, Casual Riders Ride Weekends



Members

Peak day:

Thursday

Commuter behavior

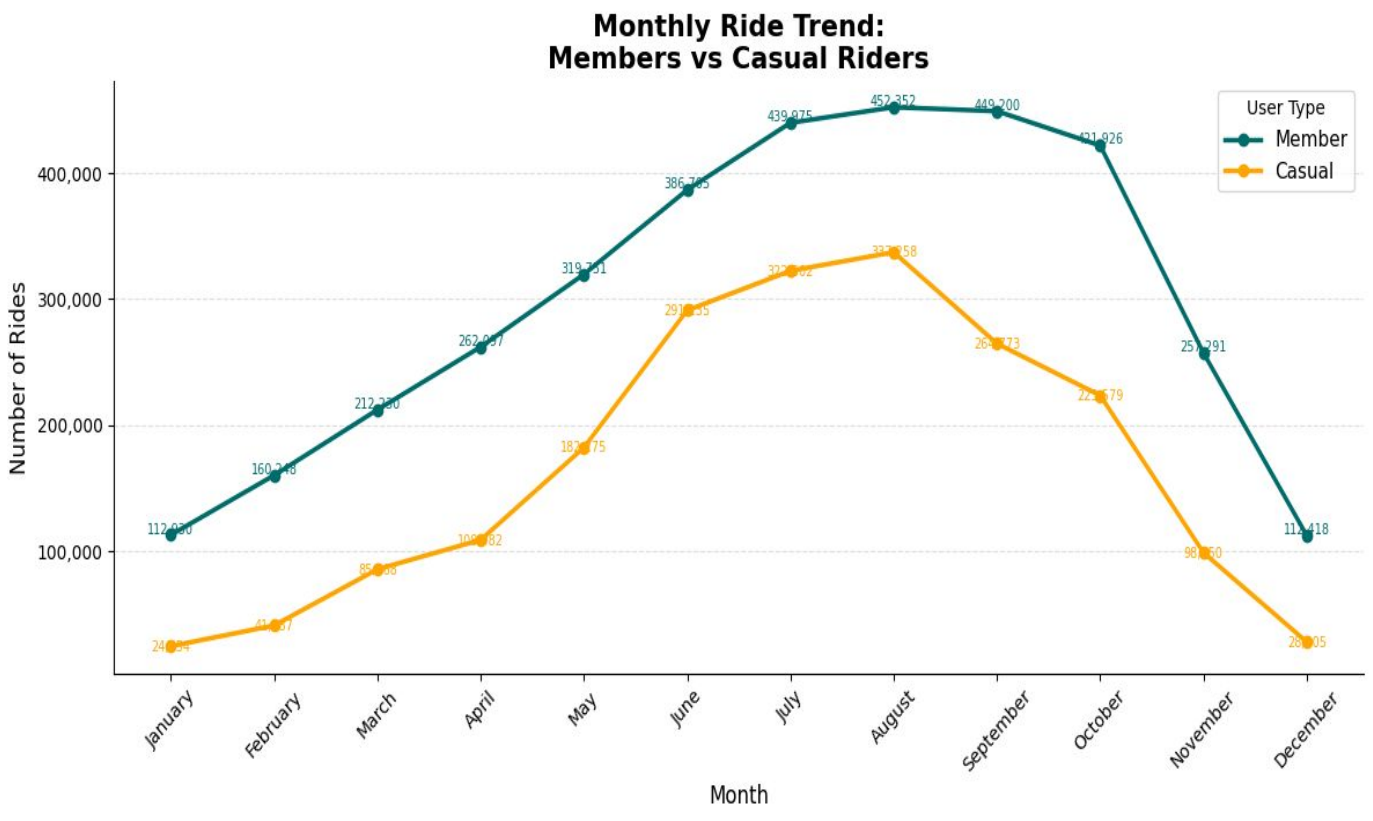
Casual Riders

Peak day:

Saturday

Leisure behavior

Finding 4 | Casual Riders Are Highly Seasonal



Members

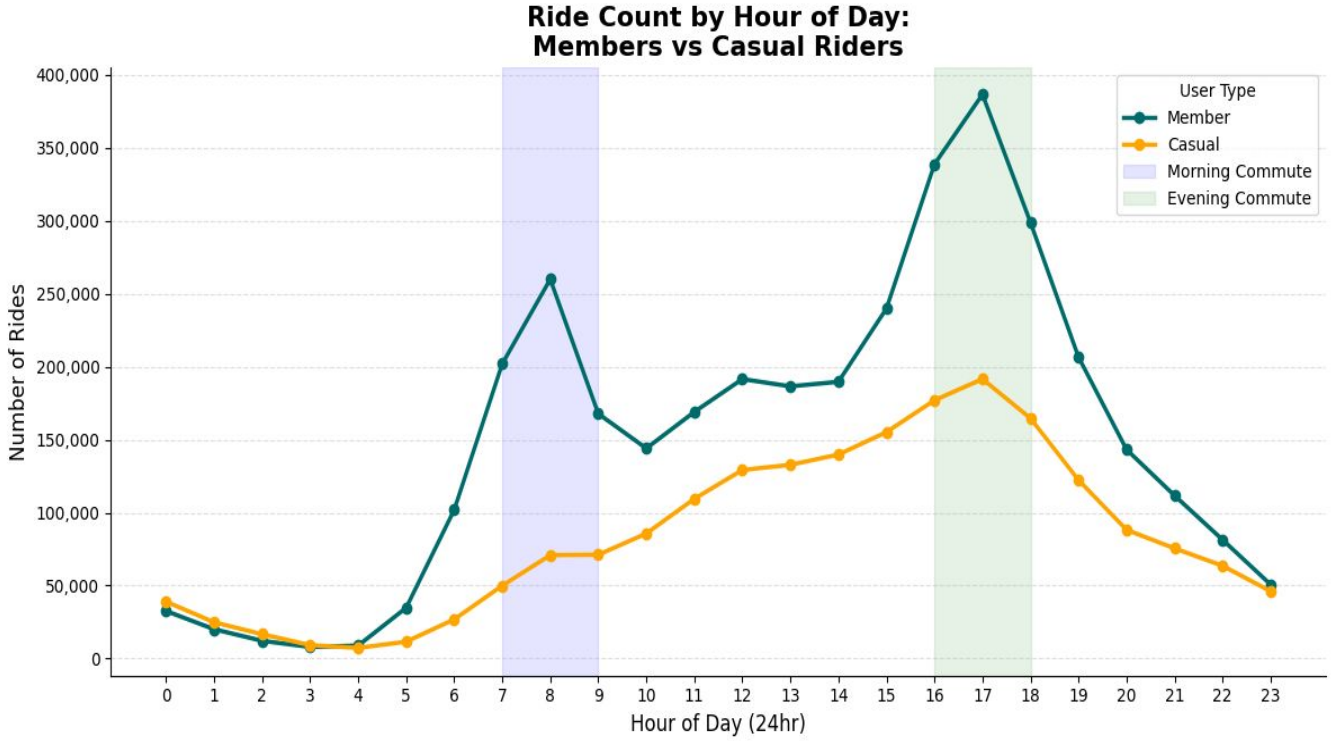
Remain relatively consistent year round — commuting is routine

Casual

Drop sharply in winter — leisure riding is weather-sensitive

Spring = Best time to run membership promotions!

Finding 5 | Evening Is Peak Time for Everyone



Morning Peak

7am — 9am

Members only

Evening Peak

4pm — 7pm

Both groups

Findings 6 & 7 | Where and When Riders Are

TOP CASUAL STATION

DuSable Lake Shore Dr & Monroe St

~30,000 rides

Leisure / Tourism area

TOP MEMBER STATION

Kingsbury St & Kinzie St

~28,000 rides

Office / Business district

Top 3 Recommendations

01 Station-Based Campaign

Finding: DuSable Lake Shore Dr is #1 casual station with 30k rides
Action: QR code posters + geo-targeted digital ads at top casual stations
Outcome: Reaches highest casual rider concentration at point of use

02 Saturday Membership Drive

Finding: Casual riders peak on Saturdays and weekends are nearly equal
Action: Friday evening push notifications with weekend discount offer
Outcome: Converts riders at their peak motivation moment

03 Spring Re-Engagement Campaign

Finding: Casual ridership rebounds strongly in March/April
Action: Email + in-app promotion before summer peak season
Outcome: Converts casual riders before they spend money on single rides all summer

Next Steps

Immediate	Present findings to executive team for campaign approval
Short Term	Launch pilot campaign at DuSable Lake Shore Dr station
Medium Term	A/B test Saturday drive vs Spring campaign — measure conversion rate
Data Gap	Collect demographic data and survey casual riders on membership barriers
Track	Report monthly conversion rate after campaign launch to stakeholders
